

ON BOARD SECURITY

Hide-Away Marine Safe

The Best way to protect sensitive & confidential information

The Hide-Away Marine Safe is the most unique broad spectrum portable high security product anywhere in the world today providing an alternative and effective security solution. This revolutionary new security product can be installed virtually anywhere, it's simple to install, easy to conceal; it simply locks on, and of, its own docking station.

Now you see it... now you don't

Unlike traditional safes, Hide-Away can be installed in a myriad of locations. The types of place thieves wouldn't even think to look. It can be installed upside down, vertical or even inside a drawer, and you wouldn't know it was there, and it's portable.....it fits any boat.

It's virtually indestructible

The Hide-Away Safe is manufactured in LEXAN® a General Electric 'impact modified Polycarbonate' known world wide for it's great strength and extremely high impact resistance. A material so strong it is used in high security applications, such as bullet- proof windows, bank security screens and in the manufacture of Police riot shields and in the space shuttle. The Abloy PROTEC (ultra) High Security Locking System is the standard locking system fitted to the Hide-Away safe.
